IN THIS ISSUE

Euronaval 2026 – The report

An exclusive report from our correspondents attending the Euronaval exhibition, held in Paris on last November, 3rd-6th. The event is recovering, following the post-COVID-19 crisis, and this year presented many news in the drones and systems fields, as well as in the sector of shipyards and naval platforms.

The Italian DPP 2026-2028

The usual analysis of the Italian Defence funding and programmes, by means of a detailed study of the Multi-year Programme Document (in Italian, Documento Programmatico Pluriennale – DPP). The document was issued very later than expected (yet we managed to view it earlier than other media did) so its analysis shifted to RID 01/27.

The news about MBDA's naval missiles

At the Euronaval exhibition, MBDA presented many news, from the two STRATUS to the AQUILA interceptor, from SCALP Mk-2 to the latest EXOCET modifications, without forgetting TESEO EVO and ASTER. So many have been the news, that they deserve a separate analysis, also dedicated to the naval vertical launchers, the true keystone for the naval missile systems.

F-35 joined the Polish Air Force

On June, 12th, 2026, the first F-35As have formally entered service with the Polish Air Force. Our correspondent from Poland takes stock of Warsaw's programme and provides an updated overview of the whole Polish Air Force.
