### Naval Surface Fire Support: What a future for the naval fire against the shoreline?

A NSFS analysis from the doctrinal and employed systems perspective. As far as the various employed weapon systems are concerned, different topics are dealt with, from the “conventional” artillery (revived thanks to the new generation, guided and augmented range ammunitions) to the missiles, from the drones to the loitering munitions.

### EI (Italian Army) is updating its air defense capabilities

Italian Army’s Anti-Aircraft Artillery is undergoing an in deep modernization programme covering both the doctrinal and training side and equipment and materials side. We did take stock of the situation with the COMACA (COMandante dell’Artiglieria ControAerei: Anti-Aircraft Artillery Commander), Brig. Gen. Giuseppe Amodio, we met at the COMACA Headquarters in Foce Verde (LT) and Sabaudia (LT).

### The VBM 30 Next Generation

An exhaustive study about the new CIO 8x8 FRECCIA armored vehicle. This new vehicle, ordered by EI (Esercito Italiano: Italian Army) in a first 76-vehicle batch, was named VBM 30 Next Generation and includes many new features, on the vehicle side (with IDV as the main contractor), as well as on the turret and electronics side (with Leonardo as the main contractor).

### The European loitering munitions

An overview of a strongly growing sector in Europe: the one dealing with loitering munitions. In such an extremely innovative and dynamic sector, there are many manufacturers and many new products.
