### The IDEF Turkish exhibition

On last July, 22nd-27th, the 17th IDEF exhibition was held in Istanbul, and presented itself as an continuously growing event. As ever in the past, it presented of course interesting news, mainly from the local industry; but also from China and Asian countries. A detailed report from our correspondent.

### Air Operations' Command and Control in the new digital environments

Combat Cloud, AI, and new technologies applied to the C2 in Air Operations: an overview of the new technologies and some considerations on the future command and control in the aerospace domain.

### Larimart: 65 years of Italian Army-aimed systems (and more)

This year Larimart (Laboratorio Ricostruzione Materiali Radio Telefonici: Radio Telephone Materials Rebuilding Laboratory), the Italian PMI (SME) specialized in electronics and personal protections, and mainly operating into (but not limited to) the land sector, is celebrating the 65th year since its foundation. So it seemed to us a good opportunity to deal with this company, renowned in particular for its equipment (computers, intercoms, etc.) onboard the Italian Army armoured vehicles and battle tanks, but since longtime evolved to significantly extend its product range to also cover ballistic protections (body armours) and CBRN (masks and clothing).

### The Italian Army drones

The Esercito Italiano (Italian Army) is very quickly introducing a series of new drones and related Command and Control systems. A study on the current new trends, with an analysis of the possible evolution paths.
