ASW capabilities are back

At present, with the underwater domain coming back into the spotlight, we can see the rebirth of all the specific ASW (Anti-Submarine Warfare) systems. Among these systems, certainly the sonars are crucial in all their different forms and architectures. A detailed overview of the different solutions and trends.

Italian Defence Budget

A detailed analysis of the Italian Defence Budget 2026: how the appropriations are growing and how they are broken down.

Surface vessels design: the trends

The next generation ships will face several challenges: citing only some of the many possible examples, it will be enough to mention the unmanned systems sector, the power generation issue, and the need for a robust protection against the cyber threats. A thorough study about the design trends and architectures for the next generation naval ships.

International Fighter Conference 2025

A comprehensive report from the International Fighter Conference held in Rome, on last November, 4th-6th: a not to be missed event to understand where the European/Western (and other) air forces are heading. This year, too, the CCAs (Collaborative Combat Aircraft), aka "Loyal Wingmen", had a vital role; but the future fighter is also much more.
