SHOT SHOW 2026

Report from our correspondent attending the SHOT SHOW held on January, 20th-23rd, at Las Vegas, Nevada. As usual, many news items were presented at the exhibition in the sector of military weapons and for the law enforcement.

Italian Army's LYNX

The most recent news about the KF-41 LYNX currently being delivered to the EI (Esercito Italiano: Italian Army). A detailed report dealing with this new tracked IFV (Infantry Fighting Vehicle).

Leonardo's small calibre weapons

The most recent news about the light guns and "small calibre" systems currently being developed at Leonardo's facilities in Brescia.

Virtual Reality and Augmented Reality

The virtual reality and augmented reality being used in advanced simulation and realistic training: from the computer gaming to the military simulation.

The military use of the Small Modular Reactors

The recent developments of small-size nuclear reactors are opening the way to a series of new military applications, including the relatively classical naval propulsion systems (for both the surface and submarine vessels), and the energy generation systems on the battlefield (to power laser and other energy-intensive users). A comprehensive

analysis of the available technologies and their potential applications.
