Leonardo's new Industrial Plan

On last March, 12th, Leonardo's CEO and General Manager Prof. Roberto Cingolani presented the updated Industrial Plan 2026-2030 for the company. The new plan is seeking a series of new goals and is focused on new technologies and MICHELANGELO DOME, the new anti-drone, anti-ballistic and anti-hypersonic shield Leonardo is developing.

NATO's air forces strategic capabilities

There are many force multipliers available to European NATO air forces: air tankers, AEW&C, ELINT, SIGINT, etc. An overview of the capabilities available to (and future programmes of) the different countries.

ENFORCE TAC 2026

Between February, 23rd and 25th, the military and police small arms-dedicated European exhibition ENFORCE TAC 2026 was held in Nuremberg. This year, the event was able to boast over 1,300 exhibitors and over 20,000 visitors, all of them professionals. Numerous updates have emerged in the field of sidearms, rifles, precision weaponry, unmanned systems (including UAVs and UGVs), as well as counter-UAV technology.

Anti-drone and anti-ballistic systems: the lessons from Black Sea and Red Sea

An exhaustive analysis of the naval anti-drone and anti-ballistic (mostly hard-kill) systems, presenting the cases of recent use in the Ukrainian conflict (Black Sea) and in contrasting the Houtis (Red Sea).
